Product Management — AI Products — Business Analysis — Product Strategy

EDUCATION

B.Tech in Computer Science & Information Technology

Expected Graduation: May/June 2027

Gandhi Institute for Technological Advancement (BPUT), Odisha

CGPA: 8.55 / 10.0

SKILLS

Product Management	Requirement Gathering, PRDs, BRDs, FRDs, Wireframing, Roadmap Planning, Competitor Analysis
Business & Strategy	Stakeholder Management, SaaS Monetization, User Surveys, Cross-Functional Collaboration, KPIs
AI Tools & Platforms	ChatGPT, Claude, Gemini, Cursor, GitHub Copilot, Perplexity, NotebookLM, Nanobanana
Technical Acumen	Python, SQL, FastAPI, REST APIs, LLM Applications, System Design, Technical Feasibility Analysis

EXPERIENCE

Founder & Product Lead — Draft Software

Jan 2026 – Present

B2B AI Workflow Automation Platform

[Live] [GitHub]

- Identified workflow bottlenecks through discovery sessions with CXOs and senior leadership at a pilot B2B marketing agency, translating business needs into product requirements and roadmaps.
- Owned product strategy from discovery to launch, balancing customer priorities, technical feasibility, and delivery timelines for the AI-driven automation platform.
- Designed and implemented AI workflow automation via FastAPI and LLM orchestration, streamlining core daily operational and communication workflows for the pilot client.

Freelance Product Engineer — Ridoxy Automation Pvt. Ltd.

Apr 2026 – Aug 2026

Government Examination System for Indian Army Air Defence

- Worked directly with CXOs and end users to gather deployment requirements, ensuring the real-time exam monitoring system met strict government criteria for an air-gapped environment.
- Designed workflows for non-technical military personnel, creating a minimalist, easily navigable UI tailored for rapid adoption in an offline setting.
- Authored comprehensive product documentation (BRDs, FRDs) and led on-site training sessions to ensure smooth client onboarding and product handoff.

Product Analyst Intern — Transit Terminal

Dec 2024 – Jan 2025

Logistics Pricing Estimation Tool

- Collaborated directly with the CEO to define product vision, translating high-level business goals into actionable requirements for a customer-facing logistics pricing tool.
- Designed and deployed a self-serve digital interface providing real-time estimates, eliminating manual inbound sales calls, reducing pricing turnaround time by over **90%**, and saving **15+ hours weekly**.

PROJECTS

Siksha AI — AI-Powered EdTech Platform

[Live] [GitHub]

- Identified exam-time revision as the highest-priority user pain point through targeted student surveys, leading to the design of "Emergency Exam Mode" as the flagship MVP feature.
- Conducted competitive benchmarking against legacy EdTech platforms (e.g., Byju's) and mapped user personas to identify market gaps, directly informing feature prioritization.
- Designed the product roadmap and MVP scope, prioritizing core features (AI Mentor, Teacher Dashboard, OCR Syllabus Upload) based on verified user needs.
- Led end-to-end development of the MVP using Next.js, Supabase, OCR pipelines, and LLM APIs, translating product requirements into a working deployed prototype.
- Designed a premium subscription strategy and engagement loops (gamification, daily streaks) to increase long-term retention and feature adoption.

LEADERSHIP & COMMUNICATION

- **Public Speaking & Executive Presentation:** Winner of 3 debate competitions (1 Inter-College, 2 Intra-College); presented structured arguments to large audiences, refining stakeholder presentation skills.
- **Community Administration:** Led communication for a **1,200+ member** technical community, orchestrating technical events (GDG, MUN), workshops, and student engagement initiatives.

RECOGNITION & CERTIFICATIONS

AWS AI for Bharat — Round 2 Qualifier (GramSetu Prototype) · Google AI Cloud Days — Global Top 800

Oracle OCI Data Science Professional (2025) · NVIDIA DLI — RAG Agents with LLMs (2025) · Oracle OCI AI Foundations (2025)
